

ACTIV ECOSilver[®]

ActivSILVER ECOsilver[®]

ECOLOGICAL DISINFECTING AND CLEANING AGENT

Works actively for 30 days

ActivSILVER ECOsilver[®] - is a natural water-based product with silver particles (colloidal silver). Does not contain toxic compounds and oxidants. Neutral pH7-7.5 of the product does not cause premature aging processes. For wide use in disinfecting

The action of nanosilver ActivSILVER ECOsilver[®] allows to achieve a long-lasting protective effect against the development of mold, bacteria, fungi and their spores, by creating a nanocoating on the surface.

The silver particles occur naturally in nature, which is why they are not harmful to health and the environment.

The innovativeness of the product lies in the ability to fragment and stabilize the silver particle on a nano scale*.

The huge active surface obtained in this way affects the increase in biological activity and results in the fight against single-cell microorganism.

The ActivSILVER ECOsilver[®] properties:

- antibacterial
- anti-fungal
- antiviral
- neutralizing odors
- stimulating the immune system of humans, animals and plants

FOR USE ON ANY SURFACE

COUNTERACTING BACTERIA, FUNGI, VIRUSES
AND THEIR SPORE FORMS

LONG ACTING TIME

PARABEN-FREE

*1 nm = 0,001 µm = 0,000 000 001 m = 10⁻⁹ m

RESULTS

The action of the ActivSILVER ECOsilver® surface disinfectant finds is used in places most exposed to threats caused by microorganisms and the possibility of cross-contamination in food production process and society.

APPLICATION RANGE:

Disinfection of surfaces, furniture and equipment, including those that come into contact with food, in public utilities, health and medical facilities, industrial and production facilities, food processing, distribution and trade.

Permit for trade no. 9976/24.

THE ActivSILVER ECOsilver® BASED ON SILVER NANOPARTICLES IS NOT HARMFUL TO PEOPLE, ANIMALS AND PLANTS. IT IS ECOLOGICAL AND DOES NOT POLLUTE THE ENVIRONMENT.

It exhibits its biocidal properties for the time the embedded silver nanoparticles remain in the substrate until the surface is physically contaminated or chemically destroyed by strong acids or alkalis.

It does not destroy or oxidize the surface and works in the long term. Permission for trade of the EU Minister of Health: No. 3159-1/28.05.2021, Office for Registration of Medicinal Products, Medical Devices and Biocidal Products No. 9976/24. Meets the EN 13697+A1:2019 standard.

ADVANTAGES OF OUR PRODUCT:

- Neutral pH 7-7.5 ensures health safety and does not damage the surface
- Extremely high efficiency of microbiological activities, which is a barrier not to defeat for bacteria, viruses, fungi and their spore forms
- Neutralizes unpleasant odors
- Registered as a biocide
- No parabens and no toxic compounds
- Easy and safe application
